Stephanie M Kolster

John Glenn

Report Issued: 01/28/2009

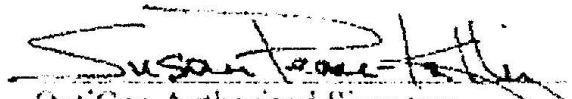

Result: **Normal**

Sample Type: **Swab**

Reg#: **RN08742601**

ID#: **AVID104866842**

OptiGen Authorized Signature

Test Results: This dog is homozygous normal (clear) for cerebellar ataxia in the American Staffordshire Terrier.

Risk for developing Cerebellar Ataxia: This dog has two normal copies of the Amstaff cerebellar ataxia gene. This dog will not develop the disease.

Significance for breeding: This dog will not transmit the genetic anomaly.

For further information, please consult the OptiGen website at www.optigen.com.

antagene

This test was performed in France at Antagene SA - Research and Analysis Laboratory in Animal Genomics. The NCL-A test for Cerebellar Ataxia is patented by INRA-ENVA. Antagene has an exclusive international license for providing this test.

International DNA Based Genetic Database. To register this result with OFA, make a copy, sign below, mail WITH FEE, to OFA, 2300 E. Nifong Blvd, Columbia, MO 65201-3856 or FAX to 573-875-5073. www.offa.org

I hereby certify that the sample submitted was of the animal described on this application. I authorize the OFA to release all information on the test results thus placing the results in the public domain and I hereby release OFA from any and all liability associated with the release of test information.
